Fall 2025
Assignment 4

There are 10 questions. Use the following formula to determine the question numbers:

$$(d + i) \bmod 10 + 1$$

Where $i = 1, 3, 5, 7$

d = Last Digit of your ID

1. Temperature conversion from °C to °F (37°C)
2. Temperature conversion from °F to °C (110°F)
3. Temperature conversion from °F to °K (130°F) ; $AX=0547H$; $K=(F-32)*5/9+273$;
4. Temperature conversion from °K to °F (300°K); $F=9(K-273)/5+32$
5. $3! + 4!$
6. $(4! + 3!) - 2!$
7. $(1! * 2!) * 6!$
8. Find out the average of the ten numbers.
9. Factorial Operation: $7! - 4! + 2!$
10. Floor size 80*80, Tiles size 4*4. How many tiles will be required to pave up the floor?
